

# CSP EBox

(Matrix)

The EBox (matrix) from CSP GmbH allows a line or dot-matrix printer with EPSON or IBM ProPrinter emulation to be seen as an IBM 4224 IPDS printer over a TCP/IP Ethernet LAN. This provides for a simple migration path from Twinax to Ethernet while maintaining full printing functionality and control. The IBM Ethernet connection to the AS/400 or iSeries host provides the same full error reporting and printing control as Twinax.

The EBox also supports printing from UNIX, Windows and Novell hosts, allowing the printer to be shared by everyone on the network.

The TCP/IP address is set through the LCD front panel. Additional configuration can be done through the front panel or via a web browser. On-board flash memory allows for easy field-upgrades to ensure continued compatibility with future OS/400 and printer releases.

## Specifications

Ethernet Port:	10BaseT, 100BaseT (auto-sensing)
Supported Protocols:	AS/400: TCP/IP (PPR/PPD, requires PSF/400) LAN (Unix, Novell, Windows): TCP/IP (LPR/LPD), IPX/SPX, NetBIOS w/IP
Printer Port:	Centronics parallel (IEEE 1284)
Supported Printers:	Line and dot-matrix printers (9, 18, or 24 pin) with IBM ProPrinter or Epson Emulation and a special set up selection for the IBM 4247 printer.
OS/400 Compatibility:	V3R1 or later
IPDS Emulation:	IBM 4224
IPDS Compatibility:	All towers supported (except vector graphics and downloaded & scalable fonts that cannot be processed properly by the attached printer)
Configuration:	Push button front panel with two-line, 16 character/line LCD display or Internet Browser (after an IP address has been assigned using front panel)
Physical Details:	Size: 6.6"x3.8"x1.4" Wt.:1.4 lbs. Power: 12 VDC 800ma wall power supply
