

CSP

EBox

(Zebra)

The EBox (Zebra) from CSP GmbH allows a Zebra bar code label printer to be seen as an IBM AFP/IPDS printer over a TCP/IP Ethernet LAN. This allows for a hassle-free replacement of IPDS matrix, line and laser printers with an on-demand label printer from Zebra technologies.

The EBox accepts standard IPDS commands from the IBM Host over a TCP/IP Ethernet LAN and converts them into ZPL II, which is sent to the attached parallel printer. Administrators or programmers do not need to learn a new programming language (ZPL), nor is it necessary to modify the bar code generating IPDS application software/drivers.

The EBox was specifically designed to work with 203 dpi printers. This cuts down on the overall cost of the printing solution while preserving the compatibility with existing applications targeted at 300 dpi printers. A particular benefit is the EBox's support of two-dimensional bar code symbologies such as Maxicode, Data Matrix, and PDF 417.

Specifications

| | |
|-----------------------|--|
| Ethernet Port: | 10BaseT, 100BaseT (auto-sensing) |
| Supported Protocols: | AS/400: TCP/IP (PPR/PPD, requires PSF/400) LAN (Unix, Novell, Windows): TCP/IP (LPR/LPD), IPX/SPX, NetBIOS over IP |
| Printer Port: | Centronics parallel (IEEE 1284) |
| Supported Printers: | 203 dpi Zebra printers with ZPL II emulation |
| OS/400 Compatibility: | V3R7 or later |
| IPDS Emulation: | IBM 4312, 4028, 3812-2 |
| IPDS Compatibility: | All towers supported (except loadable fonts) |
| Configuration: | Push button front panel with two-line 16 character LCD display or Internet Browser (after an IP address has been assigned) |
| Physical Details: | Size: 6.6"x3.8"x1.4" Wt.: 1.4 lbs. Power: 12 VDC 800ma wall power supply |
